ROTATING LOUVRE BLADE CANOPY

The Louvre Rotating Blade Canopy is an electrically operated terrace cover, ideal for outdoor Hot Tub coverage.

Operated via a remote control, the ability to rotate the blades of the Louvre Canopy upto 150 degrees means the amount of shading required can easily be controlled, allowing as much light in as is required, whilst also blocking the sun's harmful UV rays.

Contemporary in its appearance and versatile in its functionality, a Louvre Rotating Blade Canopy and Hot Tub combination can be used all year round.

When closed, the blades form a waterproof roof and the system also includes a gutter which drains the water from the blades into the columns. Anything below is always protected, as even when the blades are opened after rain, the blades are designed so the water is drained away sideways.

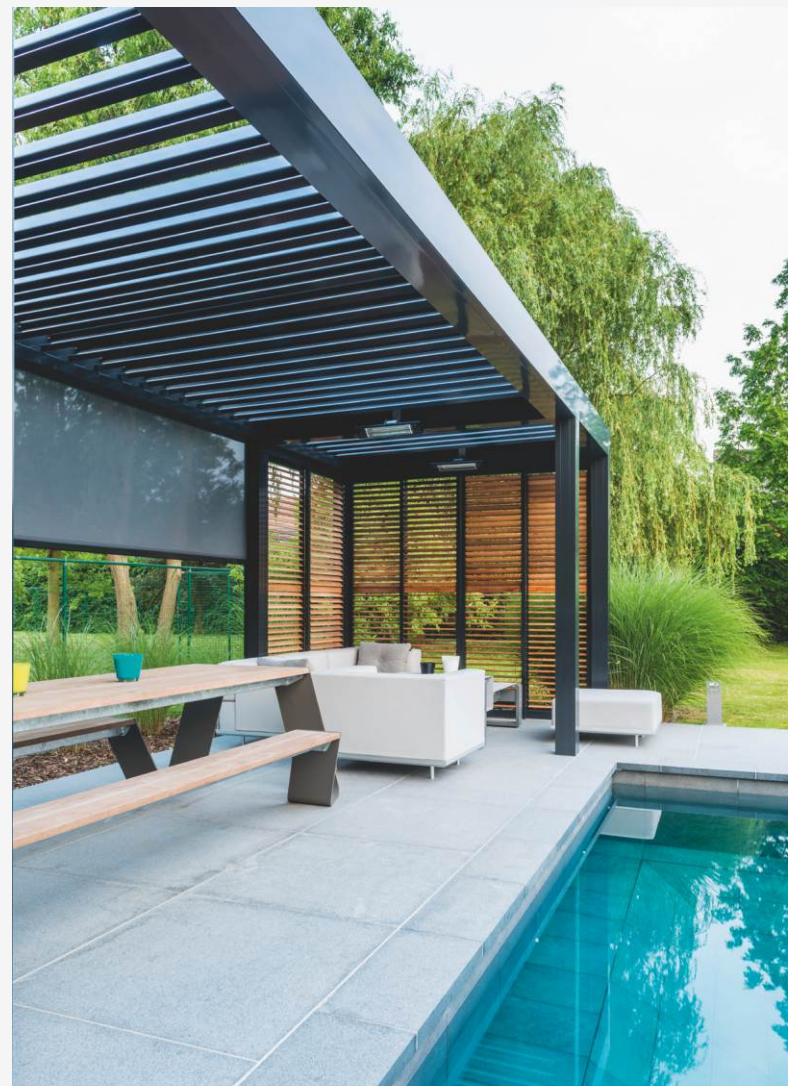

Ventilation UV Protection Rain Protection

The open blades also offer ventilation to any build-up of steam emanating from the hot water below.

Available in any RAL colour the Louvre is capable of withstanding winds of up to 120km/h

comes with an integrated guttering system, whilst taking snow loadings of 110kg/m².

Available as a free standing or lean to structure, with sizes up to 6m x 4.5m that are big enough to cover any sized tub, as a package what this offers is an extremely attractive, robust and weather resistant combination.

Additional Options

Fixscreens

Our Fix Screen sides also have the flexibility to be closed when required by the user. For those enjoying a dip in a hot tub, the additions of the Fix Screen means added privacy and also offers the user wind, sun and insect protection from the sides too!

Heating and Lighting

The addition of heating and lighting means Hot Tubs can be used all day, whatever the weather!

Sliding Doors

Loggia 'easy' sliding doors are available in either wood or aluminium blades.

ISOLA FLY FREE STANDING CANOPY

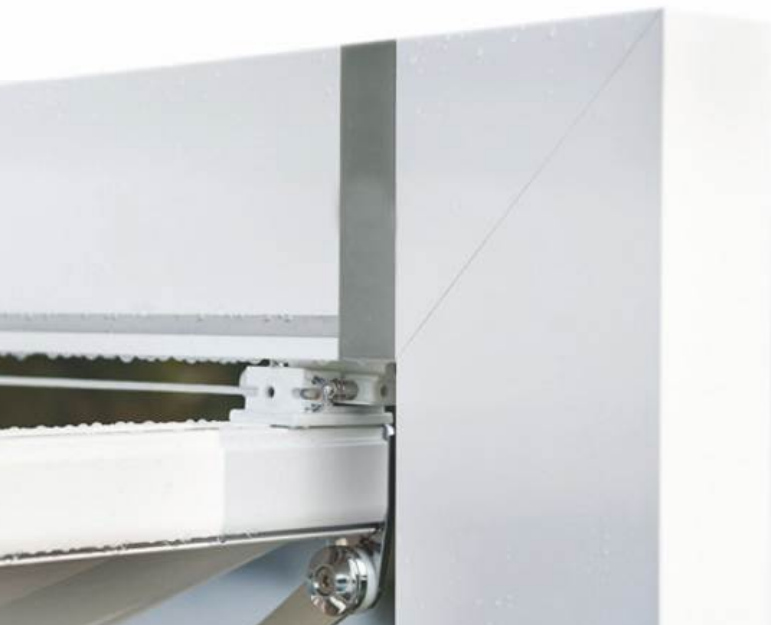

The Isola Fly is an all-weather anti-UV ray blackout PVC canopy, fitted into an unobtrusive aluminium frame that is able to compliment any hot tub or spa beautifully to offer great protection all year round.

Once the canopy cover itself is retracted back, the open view allows users to bask in the sun during the day or stare at the stars on an evening.

Using a unique patented system, the awning is opened and stretched utilising lateral stainless steel pantographs, which put the two sides in tension. Movement is transmitted on lateral guides with a high-resistance timing belt.

When closed, the stretched fabrics arched solution allows for lateral water drainage.

Available as mechanical or electrically operated. The Isola Fly canopy is available up to 4.8m x 4m as a free standing or leaning canopy.

Frame colours: Anthracite, White, Ivory, Stainless, Brown

Alternative fabric colours also available.

For more information on the Isola Fly contact us on: **01482 481050**

AURORA ROTATING LOUVER CANOPY

The Aurora Rotating Blade Canopy is a manually operated rotating blade terrace cover. Very similar to the Louvre, this lightweight version is a manually operated system, meaning no electrics are required.

Like the Louvre, the Aurora is supplied with a standard integral gutter system, through which water is drained from the louvres to the columns, with the canopy legs acting as a downpipe to drain the water away.

Available in a White or Black frame or alternative Black and White, this cost effective system is available as a standard free-standing or lean to 3.5m x 4m unit.

Perfectly sized to offer hot tubs and spas fantastic flexible coverage.

'LEAN TO' RETRACTABLE CANOPIE AND AWNING

Retractable PVC Fabric Roofs open & close in an elegant 'concertina' motion for flexible overhead coverage.

Available up to widths of 12m at a projection of 6m the structure is made from high strength extruded aluminum, powder coated to give a clean contemporary feel.

Frame colours: Anthracite, White, Ivory, Stainless, Brown

Alternative fabric colours also available.

For more information on the 'Lean To' Canopies contact us on: **01482 481050**

For more information our awning range contact us on: **01482 481050**

Awnings - Pioneering designs that beautifully accentuates a homes facade, with a large range of fabrics that extend from & neatly retracts back into a wall mounted cassette.
